POWER SUPPLIES

S50 - CURRENT LOOP POWER SUPPLY

Stabilized power supply with 115 / 230 Vac mains input and 24 Vdc 40 mA output.

Used industrially to power instruments in 4-20 mA current loop or to power from the mains instruments that require 24 Vdc stabilized voltage.

The input is protected against line overvoltages by means of a varistor. The insulation between the mains and low voltage circuits is 4500 Vac. The output is self-protected against short circuits.

The self-extinguishing Noryl case is the width of 2 DIN modules and is designed to fit on 35 mm mounting rail (DIN 46277).
